NOTICE TO ALL PRIVATE BOATS AT SEA

United States laws and regulations require that **ALL** private boats arriving from a foreign port or place **MUST** report to the Bureau of Customs and Border Protection **IMMEDIATELY** upon their arrival into the United States. Every person entering the United States must be seen in person for immigration purposes by a Customs and Border Protection officer, except those participating in the I-68 "Canadian Border Boat Landing Program". However, holders of form I-68 are still required to report their arrival into the United States to the Bureau of Customs and Border Protection. Masters and passengers must provide proof of citizenship or legal immigration status, and be in possession of a valid passport and visa, if required. Citizens of countries that are participants in the Visa Waiver Program are not eligible to seek admission to the United States under that program via private vessel. Once your boat is anchored or tied, you are considered to have entered the United States. No one may leave the vessel until Customs and Border Protection grants permission.

The only exception to this requirement is to report arrival. In order to fulfill the requirement to immediately report a private boat arrival, the master of the vessel must contact the nearest Customs and Border Protection Office, or if the arrival occurs after business hours, the nearest 24 hour port of entry. Upon reporting, you may be required to proceed to a staffed port for inspection by Customs and Border Protection. Failure to comply with these requirements could result in serious criminal and civil penalties, including seizure of the boat. International mariners are urged to report any suspicious or illegal activity to the Bureau of Customs and Border Protection at 1-800-BE-ALERT.

NEW ENGLAND – ICE CONDITIONS – CAUTION CONCERNING AIDS

The formation of various types of ice along the New England Coast and its rivers, and ice movement caused by winds, tides, and currents may result in floating aids to navigation being extinguished, off-station or missing. Fixed Aids to navigation may be destroyed and drawbridges rendered inoperative. Icing on buoys may result in their being partially submerged and/or misleading as to daymark, color characteristic and numerals possibly missing. Sound signals on buoys may be inoperative. Because of ice conditions and without prior notice, certain lighted buoys and sound buoys may be removed from station without replacement, whereas others may be replaced by unlighted buoys. Mariners are cautioned to exercise discretion in using aids to navigation in areas where ice conditions are known to prevail. The Coast Guard will prioritize ice breaking to meet most emergent needs with all available assets. Waterborne transportation delays can be expected. Industry needs to maintain reasonable expectations and consider self-reliant arrangements in the event the Coast Guard is unable to provide service inside of desired time frames.

IV CHART CORRECTIONS

This section contains corrections to federal and private maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. The mariner must decide which Chart(s) to correct. The following example explains the individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91 st Ed.	04/19/97	LAST LNM 26/97	NAD 83	(CG1)	27/97
(TEMP) NY-NJ-NEW YORK HARBOR - RARITAN RIVER						
Add National Dock Channel Buoy 3, green can						40°41'09.0"N 074°02'48.1"W
↑ Corrective Action	↑ Object of corrective Action		↑ Position (Degrees, minutes, seconds and tenths)			

The letter (M) immediately following the chart number indicates that the correction should be applied to the Metric side of the chart only. (Temp) Indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM).

RI-NARRAGANSETT BAY-SANDY POINT AND NORTH IN THE PROVIDENCE RIVER AND MT HOPE BAY AND QUONSETT AND DAVISVILLE - Severe winter weather has caused heavy icing leading to poor navigational aid reliability. Many aids have been moved off station and are otherwise unreliable. All vessels transiting these waters should consider the lack of aid reliability prior to transits and aids should not be used to determine position or safe water.
LNM 04/04 (CGD1)

MA-BUZZARDS BAY, NANTUCKET SOUND AND APPROACHES AND NANTUCKET HARBOR - SEVERE ICING ADVISORY. Severe winter weather continues to cause heavy icing which has significantly impacted navigational aid reliability. The Coast Guard continues to receive a high volume of aid discrepancies and is correcting discrepancies as conditions allow. Many aids have been moved off station and are otherwise unreliable. Aids may not indicate position correctly or mark good water. Ice may impact ability to maneuver in restricted waters. Mariners are reminded to plan transits accordingly.
LNM 04/04 (CGD1)

NY – FIRE ISLAND INLET – The following uncharted aid has been temporarily changed and relocated: Fire Island Inlet Channel Lighted Buoy 7 (LLNR 29155) changed to Fire Island Inlet Channel Buoy 7, Green can and relocated to (PA) 40°37-55.767N 073°18-06.588W.
